## PRO UNVEIL NEW KORYAK DROPPER POST

Designed for enhancing the enjoyment and versatility of your mountain biking, PRO proudly showcases its first cable-integrated dropper post at this year's Eurobike Show (Friedrichshafen, Germany, 31<sup>st</sup> August to 4<sup>th</sup> September)

Weighing in at 520g (inc. remote and cable) the Koryak adjustable alloy seat post brings 120mm of smooth non-indexed travel for on-the-fly adjustability.

The smooth downward movement and quick, responsive upwards rebound of the post is provided by a replaceable air cartridge. The mechanism is operated by an internally routed cable, which runs down the seat post and through the frame, and is connected to a bar-mounted lever by Shimano's OPTISLICK cables for optimum performance in the face of dirt and mud.

Two lever options are available, a regular up/down lever which can be mounted on the left or right of the bars, or a Firebolt-style lever (compatible with Shimano i-spec II) for those running 1x11 or a SHIMANO SYNCHRONIZED SHIFT set up, which takes advantage of the free left hand shift lever position for operating the dropper post. A full complement of spares are available including air cartridges and new bushes to prolong longevity.

- Post diameter options: 30.9mm or 31.6mm

### **NOTES FOR EDITOR**

**PRODUCT IMAGES:** <https://www.dropbox.com/sh/3eojokqfq6ecdyw/AAD9vmTRuyay-ugGUZ72FHvWa?dl=0>

**PRODUCT AVAILABILITY:** All products will be available from global distributors during the Autumn. Products will be on display at Eurobike: stand B5/300.

**PRODUCT LINE UP:** PRO creates bike components for road bikers, mountain bikers and triathletes. See <http://www.pro-bikegear.com/> for more details.

**ABOUT PRO:** PRO is the master of co-creation. At PRO we have a simple mission: To work together with the best people in the world to make the best products in the world. That's why we work with the best riders, designers and The Shimano Dynamics Lab to co-create the products you use. The pro's who put their name to our products are not just figureheads – they actually help design, prototype, test,
