

STATEMENT

RE. GIANNI MOSCON / PRO 3-SPOKE WHEEL: During the Team Time Trial of Tirreno-Adriatico, Team Sky rider Gianni Moscon crashed following an incident with his [PRO 3-spoke front wheel](#). PRO conducted a thorough investigation to replicate the circumstances, to examine its strict safety standards and to ensure that the safety of riders remains the highest priority.

The investigation concluded that the 3-spoke wheel is completely safe to continue racing. The incident occurred because the rider hit a pot hole at high speed on a tyre that did not meet the minimum tyre width specification as advised by PRO.

Athletes can have the confidence that the 3-spoke wheel is the perfect choice for victory as long as the correct usage conditions are followed.

PRO advises all customers and riders using its 3-spoke time trial wheel to choose a [minimum recommended tyre width of 25mm \(622-25\)](#), to inspect the wheel for damage following impact and to stop riding in the event of a puncture.

ABOUT PRO: At PRO we have a simple mission: To work together with the best people in the world to make the best products in the world. That's why we work with the best riders, designers and The Shimano Dynamics Lab to co-create the products you use. The pro's who put their name to our products are not just figureheads – they actually help design, prototype, test, modify, improve and fine-tune the most important components on your bike. They push our products to and often beyond their limits – on some of the world's toughest road, trails, mountains and tracks.
